

CSC VLE AI Multi-Agent 'Ravan' System PRD

Overview:

Chat-based automation system for CSC VLE to fill government job forms automatically.

Tech Stack:

Node.js, Playwright, BullMQ, Redis, FastAPI(optional), LLM APIs (GPT, Gemini, Claude), n8n (workflow)

Agents:

- Chat Agent
- Main Orchestrator Agent
- Task Queue Agent
- Automation Agent (Playwright)
- Document Processing Agent
- Network Monitor Agent
- OTP/CAPTCHA Agent
- Result Generator Agent

Workflow:

User → Chat → Main Agent → Queue → Workers → Form Fill → OTP → Result

Features:

- Parallel execution
- Network-aware (pause/resume)
- Config-driven rules
- OCR + document processing

LLM Usage:

- GPT / Gemini / Claude → only for command understanding (not automation)

Optional Tools:

- n8n for workflow triggers
- Supabase/PostgreSQL DB

Output:

- Registration number
- Form PDF
- ZIP download

Target Users:

CSC VLE operators (rural/urban India)

Notes:

- CAPTCHA manual
- OTP manual
- Resume on network failure
